Wonder-Ice® Slide-Oberfläche

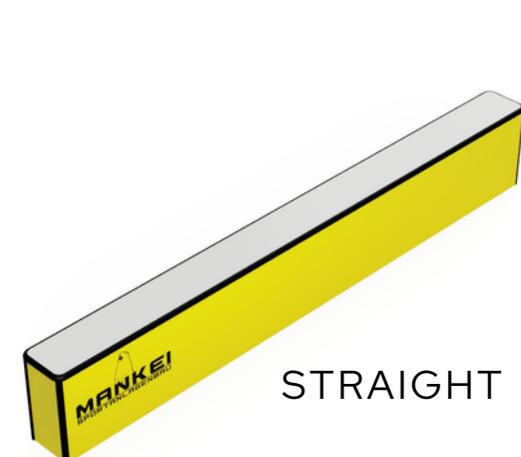

Wonder-Ice® ist ein spezielles energieneutrales Synthetikeiskonzept und beruht auf den letzten wissenschaftlichen Erkenntnissen. Im Gegensatz zu den bisherigen Produkten am Markt unterscheiden sich die hochdruckgepressten Hightech-Platten durch spezielle Additive und das besondere Know-how in der Herstellung. Durch das speziell entwickelte und gleitoptimierte Material ist eine konstante Gleitfähigkeit der Platten gewährleistet.

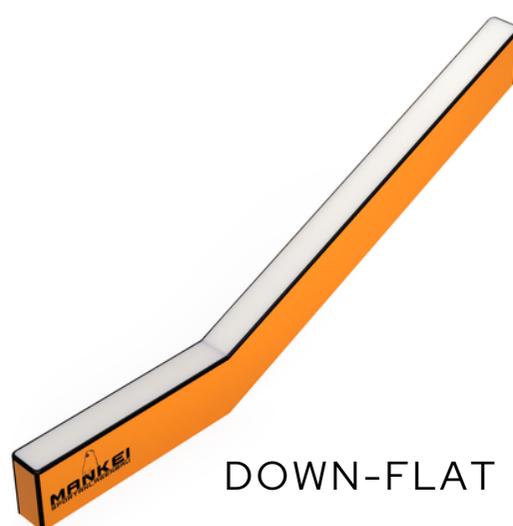

Dank dem eigens entwickelten Befestigungskonzept von Mankei, sind auf den Slide-Oberflächen weder Schrauben noch Plattenübergänge ersichtlich.

REGULAR-BOX

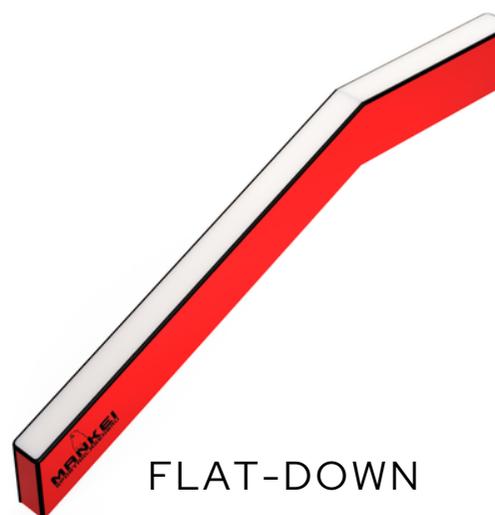

Mit 30 cm Breite bietet die Regular Box genug Slide-Oberfläche für Anfänger und Fortgeschrittene.
